Intelligent Process Automation

Solution Benefits

- Up to 100% reduction in errors

- Up to 85% reduction in time

- Up to 65% reduction in costs

- Greater stakeholder engagement and satisfaction

- Build once and deploy everywhere

- Enhanced transparency, security, and compliance

- Low risk and speed of delivery

IHS Automation's Digital Process Automation Platform (DPA) works with your existing systems, enabling your organization to quickly change and automate the way you work.

INTRODUCTION

No one is addicted to Excel and PDFs, which require a lot of manual effort. However, you wouldn't know that sometimes by looking at what is happening inside your organization. We don't expect to eliminate all manual processes. Still, we will improve your productivity up to 85% and reduce costs up to 65% while eliminating errors.

OUR SERVICES

IHS Automation helps build a high-performing culture that meets the demands of the fast-paced, customer-centric, digital world in which we live. We help you stay on top of customer expectations and needs, which are evolving faster than technology.

Management Consulting
We enable everyone to work towards the same goals and ensure your digital initiatives generate business value in measurable ways.

Process Automation
Our collaborative approach enables business units to drive full-scale business transformation and employees to work without the challenges of disruption.
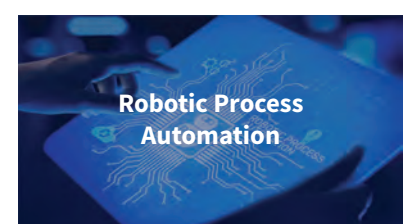

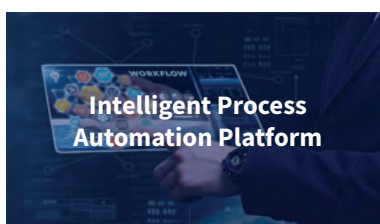

Business Transformation
We help you streamline the employee experience to increase collaboration and engagement, raise performance output, improve accuracy and ensure compliance.

Operational Support
We partner with you to respond to customers and stakeholders' new expectations, needs and requirements. We empower you to address additional business problems with minimal costs.

Predictive Analytics

Artificial Intelligence

The IHS Automation Difference!

We have the domain knowledge and expertise to quickly identify the inefficiencies that create business blind spots and inhibit improvements. We align new digital process automation capabilities and strategic drivers to organizational culture.

Our enhanced employee engagement models will empower employees to perform at their best. We ensure your digital initiatives guide everyone towards the same goals and generate business value in measurable ways.

We eliminate mundane tasks like data gathering and verification (human data factories) while increasing performance feedback to help employees keep up with dynamically changing business demands.

We enable you to automate critical business processes in weeks. Our technologies quickly scale across disparate organizations, teams, technologies, devices and applications creating a seamless business enterprise.

IHS Automation will help you make the most of your human and technological capabilities. Our employee engagement model and ecosystem of intelligence automation technologies enables systemic improvements in organizational efficiency and effectiveness while simultaneously providing a superior customer experience.

Popular Use Cases

Acquisitions and Procurement	Approvals and Routing
Case Management	Inventory Management
Logistics and Supply Chain	On-boarding/Off-boarding
Recruitment and Hiring	Service Requests
Human Resources	Data Analysis & Reporting

About IHS Automation:

IHS Automation has been providing digital transformation services and solutions to Government and commercial clients for more than 25 years. Our unique blend of experiences (i.e., academia, Congress, executives, managers, and union officials) enables us to provide a variety of different perspectives.
